## Company Overview

Independent provider of clinical care services giving patients local access to NHS-funded procedures through 'Patient Choice' across orthopaedics (most commonly knee and hip replacements), spine, general surgery, gynaecology, and urology. Works with over 100 professionals (surgeons and anaesthetists that are mostly employed by the NHS, on a subcontracted basis) across 9 independent hospitals and 37 outreach clinics. For the year to March 2025 One Health provided much needed care to 17,020 new patients, through over 42,000 consultations and over 7,000 surgical procedures.

One Health is focused on areas where NHS patient needs are under-supplied by the local NHS service, population density is relatively high and the level of private medical insurance or the ability to self-fund is relatively low. Currently, the Company's activities are focused in Yorkshire, Lincolnshire, Derbyshire, Nottinghamshire and Leicestershire. Revenue is derived from over 60 NHS commissioning bodies in addition to contracts with local NHS Hospital Trusts to transfer their internal waiting list patients to One Health for quicker treatment.

## What is 'Patient Choice'?

NHS patients have a statutory right to select One Health as their provider of care through 'Patient Choice' with all treatment provided free of charge, at no cost to the patient, with One Health being funded by the NHS. The NHS e-Referral system (e-RS) allows NHS patients to choose their provider of care from a selection of NHS and independent sector providers as well as the date, time and location of their appointment to suit their availability. GPs may be able to book this e-Referral appointment immediately during the GP appointment.

**New agreement struck between NHS and independent sector in Jan 2025 to help tackle waiting lists and give patients greater choice:** [Deal between NHS and independent sector to cut NHS waiting lists - GOV.UK](#)

## Why patients choose One Health

## One Health in numbers

## Surgical Hub

A significant part of One Health's growth plan is to establish Surgical Hubs in critically under-served areas, which will be owned and operated by the Group rather than potentially requiring patients to travel long distances to existing independent facilities within One Health's network. The business is well funded to execute on this plan and has made significant progress to identifying surgical hub locations

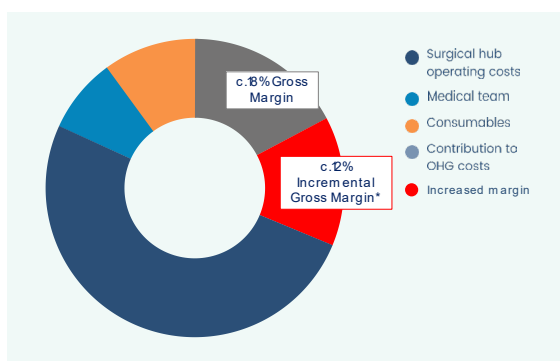

Contracts have been exchanged to purchase land in the North of England for the site of the first Surgical Hub, with full planning submitted in March 2025, and expected to deliver significant additional operating capacity in 2026.

## Financial benefit of surgical hubs

### High density regions (third-party operating theatres)

### Low-capacity regions (One Health surgical hub model)
